Skill course for employment

A new skills course aimed at helping recent school-leavers and those seeking a new career find employment locally, has been launched in the North West.

The six-week specialist training programme is a joint enterprise between Hawthorn Heights Ltd, North West Regional College (NWRC), the Construction Industry Training Board (CITB NI) and Unite the Union, and offers a guaranteed job interview for each

of the candidates who complete the training.

The course 'Hawthorn Heights (Specialised Training) – the Fundamentals of Park Construction' will give 16 people the opportunity to learn the fundamentals of Park Construction at NWRC's Greystone Campus in Limavady.

With no qualifications or experience needed, this is an opportunity for anyone seeking a new challenge to apply

for this specialised training programme and see where it can take them.

Raymond Bolt, Curriculum Manager at NWRC said: "NWRC is pleased to be able to deliver this specialised training programme with support from CITB NI, Unite NI and in collaboration with Hawthorn Heights. The college has a track record of delivering high quality industry-relevant training and we look forward to welcoming successful ap-

plicants to take part in the course."

Ciaran Farren, Hawthorn Heights said: "This is an excellent opportunity to join an expanding company, while gaining the essential skills required for your potential job role through the NWRC."

"We are excited to be partnering with the NWRC, CITB and Unite the Union to provide, what could be, a long term career for applicants within the programme."
