

# Sustainable Products for Sustainable Building Conference followed by a site visit

Smart ECO Hub  
innovating for a sustainable future

**When** Thursday 12<sup>th</sup> June 2014

**Where** Agri-Food and Bioscience Institution  
Hillsborough

**Time** 10.00am – 4.00pm

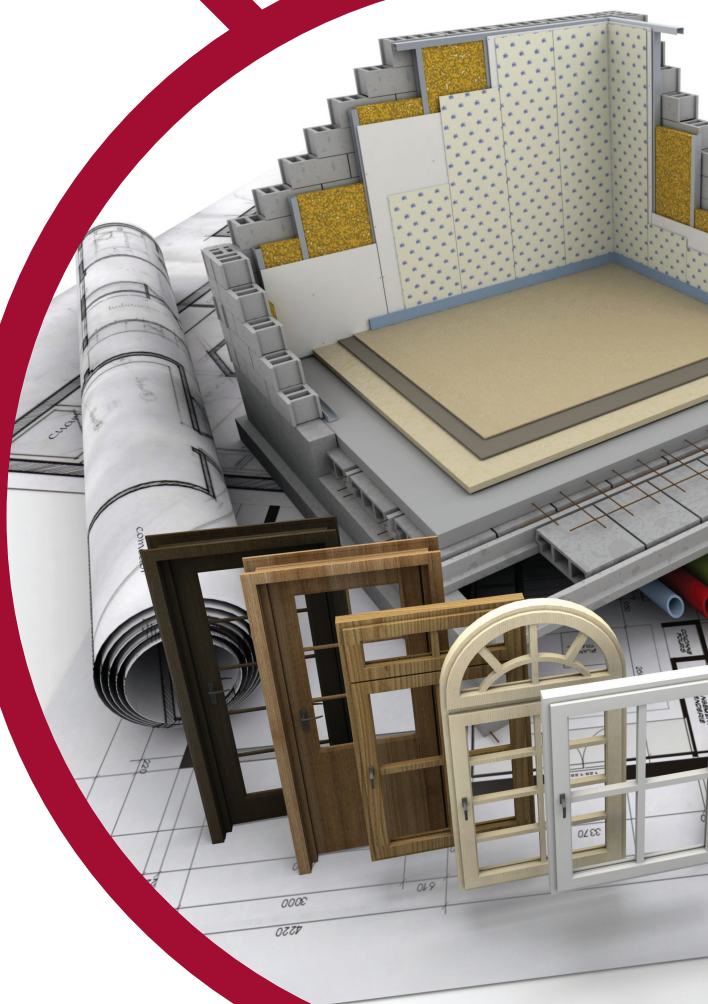

An important part of creating energy efficient buildings is to use materials that are environmentally friendly. They are distinguished by having low embodied energy and contain recycled or renewable materials that use lower levels of petrochemicals. This event will give designers, specifiers and builders an opportunity to find out what is available both in Ireland/Northern Ireland and further afield and how they might be used in current new and renovation building projects. Innovative approaches to timber, hemp, lime, sheeps wool and much more will be on show.

## Welcome Address

Minister Mark H Durkan *Department of Environment NI*

## Speakers Include

- Paul McAlister *Paul McAlister Architects*
- Liam Brown *Enviroform Solutions*
- Robert Clements *NI Housing Executive*
